

What VION Makes Different?

Unlike typical multimeters where the black probe is minus and red probe is plus, Vion has only a pair of probes that can suit both plus and minus despite color.

VION

Existing Multimeter

Automatic measurement	Automatic diagnosis and battery life based on measurement target	Only displays numbers
Auto Selecting	Automatic detection of AC/DC/Resistance	None
Voice Guidance	multilingual voice speaking on mobilephone app.	None
Store connection	Direct connecting function between APP. and shop.	None
Expert/General Mode	Auto mode for general public Manual mode for expert	None
Data Sending	Measured data sending immediately	None
Easy Storage	Compact enough to fit in one hand

SMART DIGITAL MULTIMETER

Smartphone Connected
Digital Multimeter

Simple & Easy

The World's Simplest Bluetooth Multimeter

- Automatic Detection (DC/AC)
- Automatic Diagnosis (Fuse, Motor, Charger, Various Type of Battery & Outlet Electricity)
- Step-by-Step Guide with Video Clips & Photos
- Multilingual Display and Voice Guidance
- Digital Multimeter is available at App Store(IOS & Android)

Smartphone connected Digital Multimeter

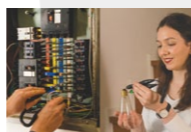

Safety

The automatic detection function immediately recognizes DC / AC / Resistance, So don't have to worry about the risk of damage due to wrong selection.

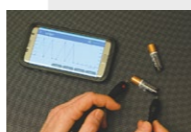

Connection between VION and Mobilphone

VION has only a pair of probes. All necessary work, (measurement guide, display, storage, transmission, shop-matching, multilingual), Your mobile phone will be responsible.

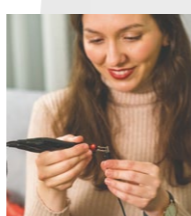

Expert / General Mode

If you are unfamiliar with electricity, Use auto mode. If you expert, Use manual mode. VION will immediately dignose.

Automatic Detection

VION automatically detects the measurement target product by displaying the status of versus the measurement. This clearly outlines the voltage reference for each measurement target.

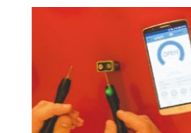

Voice Guidance

Even when your smartphone is in your pocket, measurement results are delivered through voice guidance. This removes the risk of any sudden movement when attempting to measure objects and allows you to see the results simultaneously, making it possible to complete tasks that require more than one hand.

Easy Storage

A pair of probed Vion meters is small enough to fit snugly in your pocket and perfectly in your toolbox. In addition, the protection case enhances user convenience and can easily be stored with measurement aids.

Automatic Measurement Storage

Vion automatically saves measured values by date/time and facilitates management of a large number of measurement objects, relieving the trouble of re-measuring items.

Multilingual Support

The voice guidance feature is supported by multiple languages : English, Spanish , French, Japanese, German , Chinese, Korean, Russian , Portuguese, etc

Complete Detail/Analysis

Manuals on measured products are presented by images to diagnose the fault, and this provides general users with a comprehensive guide on the measured products

Store onnection

The Vion app can connect directly to the store for purchases of measured products, reducing other unnecessary purchases and costs

Data Sending Function

If you need to send the measured data to someone urgently, Use VION's that feature.
