

The Magic of the Skin Begins

Premium Peptide Volume Essence

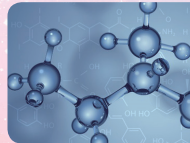

Premium Peptide Volume Essence

Contains anti-pollution complex to protect skin from yellow dust and fine dust

The anti-pollution complex is a component that protects and cleans the skin from harmful heavy metals in yellow dust and fine dust. It is effective in improving wrinkles caused by fine dust and effective in skin regeneration.

Scientific and Innovative Ingredients
Contains expensive peptide raw materials

Peptide here means Oligopeptide which contains up to 50 amino acids, the basic components of a protein. Unlike other materials, there are difficulties in the manufacturing process and cost burdens, but it is spotlighted as next-generation raw material and various bio technological research have been continuously being made.

Containing Centella Asiatica Extract

It is also known as tiger grass, as there is a myth that a tiger rubbed himself and cured when he was injured. Centella Asiatica has the active ingredients such as asiaticosides, saponins, and madecassic acid in the leaves and stems to help smooth skin.

Containing Volulifine

Volulifine is a vegetable component extracted from the root stem of a plant called Anemarrhena asphodeloides belonging to the family Liliaceae. It is one of the most famous and popular ingredients of Sederma that helps nourish firm skin in its 50 years' history.

With your Precious Skin Macklin Sun Cream!
