TABLE OF CONTENTS

NAVIS strives to

earn trust and love by satisfying customers with the best products and services all the time.

We make the world clean, comfortable, and happy with bedding.

"Sweet Dream Maker"

We will make clean, comfortable bedding

that anyone can tuck in and hug for pleasant dreams.

navis

NAVIS strives to earn trust and love by satisfying customers with the best products and services all the time. Customer satisfaction is the foundation for our members' development and the company's social responsibilities.

NAVIS MISSION | VISION | VALUE

"Exceptional love for **cotton**, This is **NAVIS** heart."

Korean Typical Duvet & Comforter

'Consumer's Comfortable rest and happy dreams' are Nabis' wish and the firm promise of you and Navis.

Since its founding in 1972, Nabis has been striving for only one goal for nearly 50 years.

"Honest effort to make hygienic and comfortable bedding"

This is the constant motto that NAVIS has been keeping up since it was founded.

As a result, NAVIS now has grown to never ending growth, not only in the production of natural sheets such as cotton, silk and cotton-wool, but also in the production of bedding with various cutting-edge functions such as antibacterial, deodorant and far-infrared radiation.

However, NAVIS' strong challenges and efforts for a new leap will not stop there. The strength of NAVIS lies in its high-tech technology that has accumulated over many years, and our unique affection and differentiation of cotton.

Although it is hard to recongnize directly by the eye because it is covered with the fabric, anyone can easily feel it after touching, covering and hugging.

Cover NAVIS duvet/comfortert. And please feel free to relax and have a happy dream and relaxation that you can feel only in NAVIS duvet/comforter.

AROMA SLEEP INTRODUCE

Fragrance comforter,

The fragrance of nature into my own bedroom!

Aroma Sleep is a new-concept fragrance duvet and comforter created by Nabis.

This is a bedding product containing a functional microcapsule, which was selected as the Korea Technology Innovation Development Project in 2015 and funded 400 million won by Small and Medium Business Administration for two years of research.

Fragrance Comforter

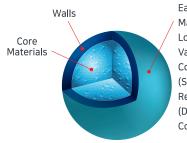

Aroma Sleep

Aroma Sleep containing a functional **microcapsule** slowly releases the functional materials in the capsules(fragrance material) for on-going antibacterial, deodorizing, and mothproofing functions. It repels 98% or more house dust mites.

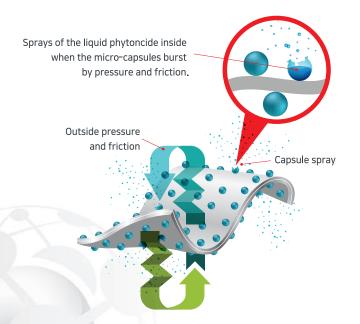

Also, the fragrance will continue for the duration of use.

66 Heal daily with 9 various aromatherapy for healthy sleep. 99

Easy Handling Materials Dispersion Long-term Preservation Variety Compatibility (Several Core Matirials) Response to Stimulation (Discharge Inhibition of Core Materials)

MICRO-CAPSULE COMFORTER

The micro-capsule cotton nacro is a micro-sized granulation capsule, wrapped around a certain polymer material to protect the function and regulate the release of the central substance. As a result of the Korea Clothing Protection Program, harmful ingredients of the capsule material and the binder that is attached to the fabric were not detected.

Aroma Sleep is a bedding product that functions as a microcapsule, where pressure and friction cause the microcapsules to burst, the oil-steady aroma inside is sprayed and the more you turn around the quilt, the more fragrance you have. In addition, the combination of antibacterial and dust mite repellent microcapsules is much more hygienic than regular duvet/comforter and provides excellent anti-atopic effect with 98% or more house dust mites repellent. You cannot see the functions of other products, but you can check the functions of Aroma Sleep products simply by knocking on them.

Aroma slip is the world's first Nabis special feature.

Patent No. 10-1602931

"The fragrance will continue for the duration of use."

Sustainable aroma

for 45 washes.

See a comforter filled with aroma!

We give you a healthy and pleasant bed as a natural fragrance in your bedroom.

Create your own lifestyle with the joy of life, the richness of your mind and the healthy fragrance of your bedroom!

- Aroma Sleep wraps functional material with Micro-capsule to protect from external environment and prevents change of function.
- Functional materials are slowly released by pressure and friction, so the timing and concentration of release can be adjusted.
- Even if you wash it many times, its functionality will not be lost and will last for a long time.

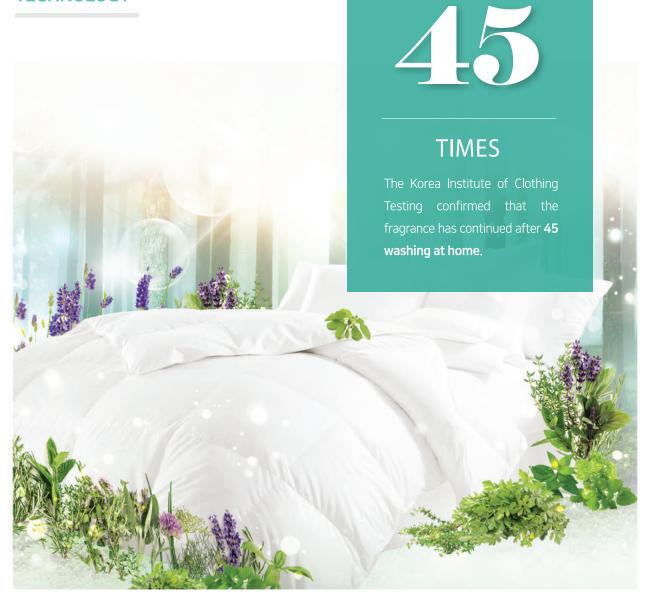

Aroma Sleep can combine several functional capsules into a single product to produce a versatile functional product.

9 fragrances, 9 colors

Fragrance Sleep NAVIS TECHNOLOGY

Fragrance maintainable Number of wash

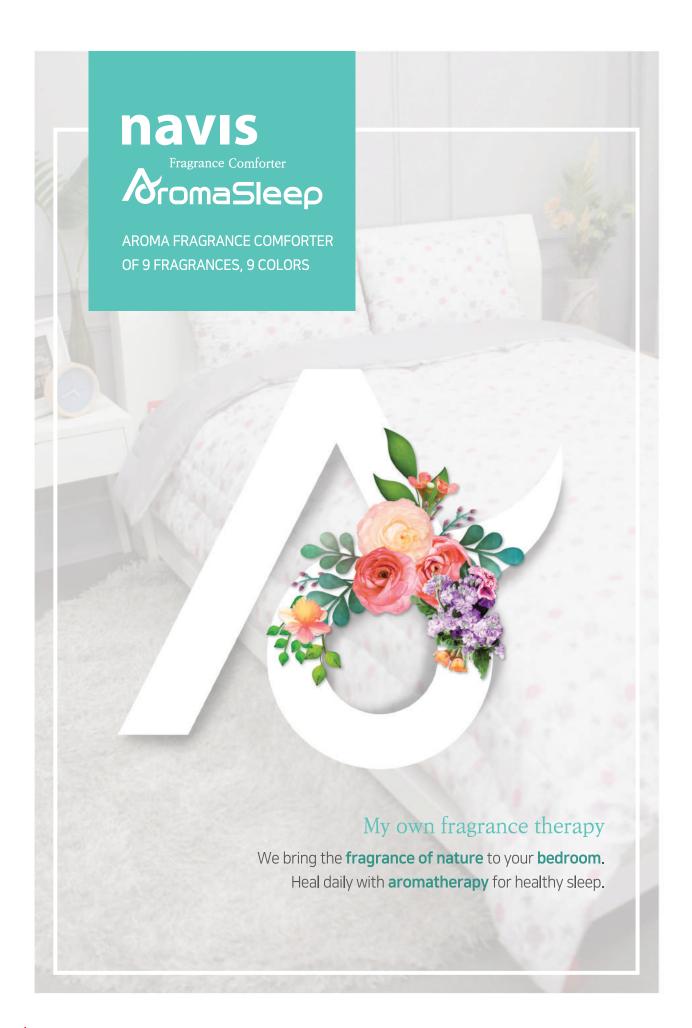

Extended antibacterial effect The micro-capsules encase the functional materials to be protected from the external aggressors and deterioration, so the activity of antibacterial effect hold out for a long time.

Mite repellent | Antibacterial | Atopic skin infection prevention

PRODUCT INFORMATION

INTRODUCTION OF ITEM AROMA SLEEP

Outstanding antibacterial effect

There are functional materials in the micro-capsules for protection from the external aggressors and prevention of deterioration.

Natural materials

All parts that come into contact with the skin are made of natural textiles (cotton, hemp, wool, linen, silk, cashmere) that are effective to young children and people with diseases.

Aromatherapy

It relieves stress to strengthen your immune system and enhance your body's healing capacity. It can also help with cell regeneration.

Reasonable pricing

It is a functional product, but we produce our own products to eliminate middle margin for honest and reasonable pricing.

Meet the comforter and duvet full of aroma!

We present a healthy, pleasant sleep with a fragrance full of nature in your bedroom.

Make your own lifestyle with a healthy fragrance in your bedroom, full of life's joy and spiritual affluence!

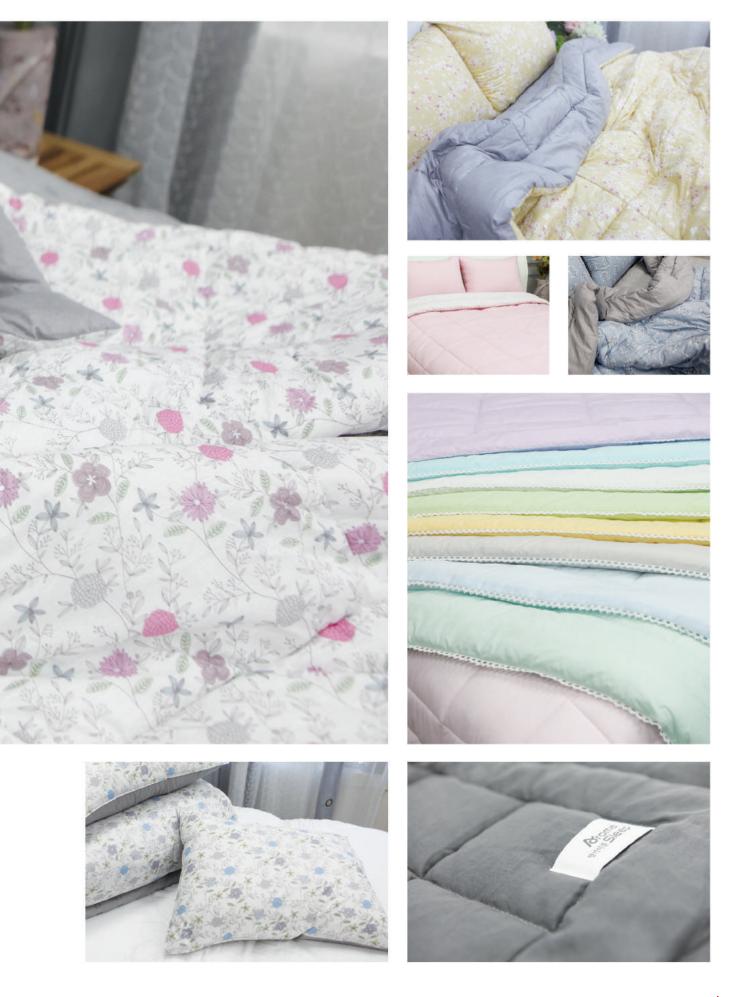

Micro-capsule wraps functional material to protect from external environment and does not deteriorate easily.

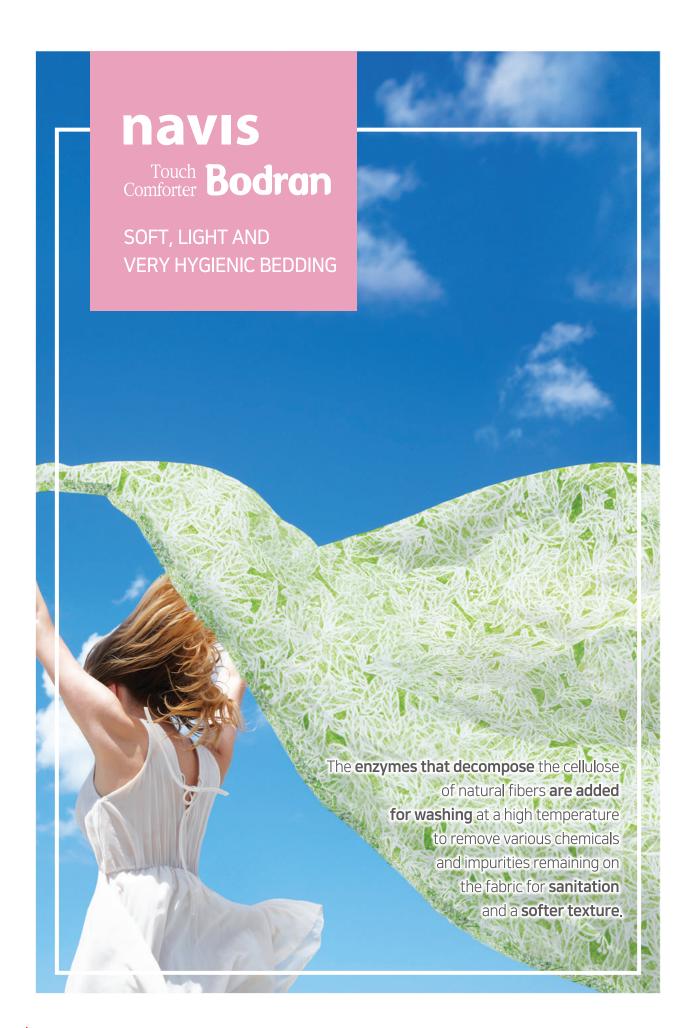

9 Various Aromatherapy for a healthy sleep.

the functional materials in the micro capsules slowly releases for on-going antibacterial, deodorizing, and mothproofing functions. It repels **98% or more house dust mites**. Also, the fragrance will continue for the duration of use.

PRODUCT INFORMATION

INTRODUCTION OF ITEM BODRAN

Washing with enzymes

Bio-active washing with enzymes smoothes the surface of fabric to prevent napping or lint.

Soft and smooth texture

Bio washing prevents deformation for a long time and active washing for high quality allows the product to stay soft and smooth to touch.

Sanitation with washing at a high temperature

The fabric is steamed at a high temperature to remove impurities and convert to a texture that is smooth, so we can feel clean and sanitary.

Bio-surfactants have not many cases where high efficiency mass production is not easy to produce. But in terms of efficacy, they are better than chemical surfactant, leading to the possibility of being commercialized as long as productivity and cost saving issues are settled.

Bio-surfactants were limited to specific applications in high cost and low productivity but only NAVIS has a competitive edge to replace the existing chemical surfactant by bio-active washing treatment.

Bio-active washing smoothes the surface to prevent skin irritation, while the colors look graceful with natural crease.

GRACEFUL COLORS
AND NATURAL BEAUTY

he fabric has already been deformed in the bio-active washing processing, so its size and thickness will not change.

Sanitary bio-active washing

The processed **60's ASA Cotton** with the best thermokeeping property and coziness is used for **bio-active washing** for sanitation and a soft texture.

BODRAN Bio-Active Washing for Comforters | BODRAN Bio-Active Washing for Pad

PRODUCT INFORMATION

INTRODUCTION OF ITEM STANDARD

Soft and warm natural fibers

The duvet is produced with natural fibers with the best thermokeeping property and coziness. The natural, eco-friendly material is lightweight and cozy with exceptional elasticity to make premium comforters.

Lightweight and soft microfiber

The microfiber fabric for the casing is made even more lightweight and softer for this practical microfiber duvet.

Clean and practical cotton

Low-denier cotton is used for softness and thermokeeping property. This economical duvet has antibacterial and deodorizing properties to prevent bacterial proliferation and moth.

Goose Down, which is supplied using only the hair of a goose that has grazed in its natural state, is a luxury product that contains more than 93% of its fluff

MICRO MODAL

MICRO

It operates a fabric-certified system around the world and boasts a lightweight smooth texture like a feather. It's a plant-friendly duvet/comforter cotton made of natural ingredients.

It's as mild as a goose fluff, using a thin, semi microfiber. A smooth texture like silk provides a pleasant sleep environment, and a chess symbol on the fabric adds luxury.

BASIC

To provide a more affordable distribution, it is duvet of non-ringed, stringed joint and keeps the body warm by heating both sides.

Best thermokeeping property goose down, perfect delicacy and softness of Micro modal, the eco-friendly fiber extracted from Fagus engleriana Microfiber CHESS, the lightweight, soft, and cozy microfiber BASIC

Softness, excellent hygroscopicity and moisture proof, antibacterial function and excellent warmth make a pleasant and healthy sleeping environment.
