A compound also known as Botox peptide, excellent for improvement of wrinkles and skin elasticity
03. Multiple Marine Complex

Various types of ingredients from the sea provides skin hydration and nutrients that help strengthen skin immunity

SIRTALICE™ (Bacillus Ferment)

Ingredients acquired from fermenting freezing blast found in the extreme environments of 1.5°C at 3,400m under the sea

- Improve skin elasticity by enhancing epidermis and dermis
- Activation of cell energy to promote lifting effect

S-Cold fermentation
The technique of Sirtalice™ is an environmental friendly technique discovered from nature. It allows fermentation at 10°C, a temperature similar to the underwater conditions of the microbes' environment

CLINICAL TEST RESULT

※ Applied 2% Sirtalice™ cream on 2 times a day, for 28 days

RESULT Visible skin elasticity enhancement | Increased firmness in the eye area

RESULT Excellent V-lifting effect | Effectiveness in nasolabial folds and marionette lines

Radiance & Hydration TEST

RADIANCE
15.1% INCREASE ↑
