Nature Ingredient Complex Concept for Acne Therapy

It contains ingredients such as salicylic acid, benzoyl peroxide, azelaic acid, and triclosan, which are already available in other companies, which temporarily helps to improve acne, but it can cause various side effects such as severe keratinization or dry skin dryness in the long term and antibiotic resistant bacteria Problems such as emergence of attention

It is difficult to treat or prevent essential diseases such as inflammation drugs, acne inhibitors and pore-filtering agents.

At the same time as the safety of medicinal products, it can alleviate adverse effects and prolong the treatment of acne when used for a long time with natural extracts. It regulates secretion of sebum which is the cause of acne, prevents excessive secretion of sebum and helps to keep makeup of sebum.

Simultaneous drug efficacy safety using natural medicinal extract

Reduce side effects during long-term use and help prevent and treat acne.

Instead of using drugs that open clogged pores and inhibit acne bacterium to cause inflammation, it is effective in treating acne and preventing effective acne, and has anti-inflammatory and anti-bacterial effect
