Electronic Charming Water!

This is the smallest **UNG** Water Softener using electrostatic field. Improve the quality of incoming water and provides a high quality water environment.

What is the principle of electrostatic field technology of **UNG** Water Softener that dose not require electricity?

※ What is Electostatic Field?
The stationary positive and negative charges mutually intercat at a interval to generate an electric force.

Scientifically designed home skin manager **UNG** Water Softener!

Change of Water, Skin · Hair PLUS CARE

F E A T U R E S
