TONGIL POCKET CASE

Tongil Pocket Case is the leading manufacturer specializing in portable case development and manufacturing. We manufacture compact and fashionable portable cases that help our customers to express their personality anytime, anywhere.

We will make our best effort to create portable cases that can package precious value of our customers through continuous research and development. Thank you.

EXPERTISE

For more than twenty years, Tongil Pocket Case has specialized in developing and manufacturing portable atomizer. Being capable of developing any specific designs and solutions for our customers, we are supplying our products and services in many areas where portable atomizer are required.

QUALITY

To ensure utmost customer satisfaction for our customers, our primary goal is to provide our clients with products and services that satisfy with their needs and requirements. The quality control of our products are done by highly qualified and reliable professionals.

INNOVATION

Since the establishment, we have focused our efforts on developing portable products. Also without being complacent, we have continued to make our best efforts to create portable atomizers that are easy and fashionable for our customers.

Touch up Style

Touch-Up Style has maximized the convenience of spraying for the customers. Traditional style atomizers have a separate cap, making you to open and find the spraying direction by using two hands. But we made this process simpler and quicker by applying our latest unique **Touch-up style**. Now you can spray the pump by using only one hand with a simple touch. Also you can instantly find the spraying direction once it is in your hand. **Intuitively**, it can be used the moment you take it out from the pocket or pouch.

Simple and easy to use

ONE HAND SPRAYING

With the existing product, one hand is used to hold a bottle and the other to open a cap, Touch-up can be used only with one hand by a simple touch to open the cover

Instantly finding the spraying direction

INTUITIVE USE

Checking the spraying direction is no longer required. Touch-up can be sprayed directly once you hold it in your hands.

- Spray without having to look with your eyes

Experience the comfort ERGONOMIC DESIGN

The elegant curves in the mid gives you a classy feel and it fits comfortably in your hand.

SENSUOUS TOUCH

Implemented with a sensuous
Touch-up structure using elasticity.
Designed for easy pressing

SAFE CARRYING

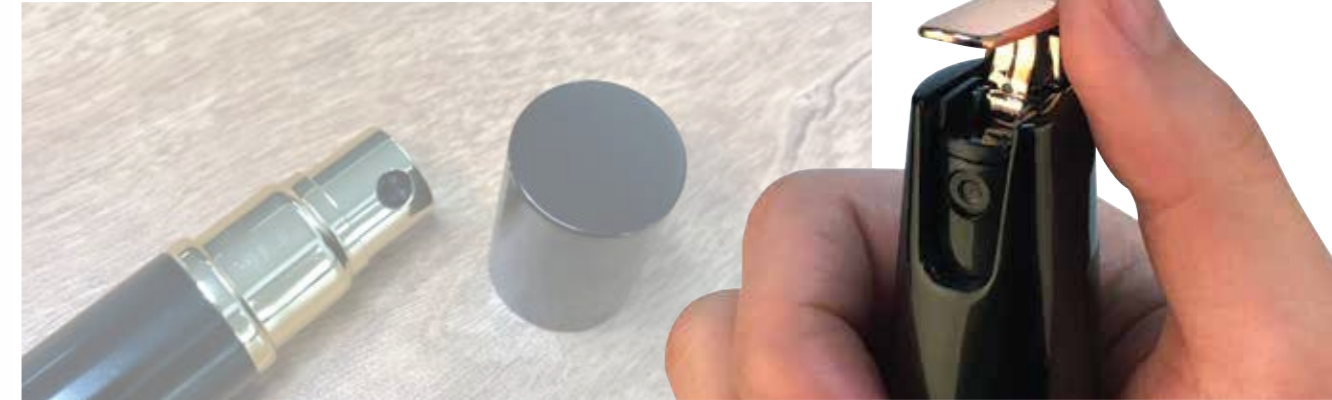

Touch-up smart cover prevents
unexpected leaks inside the pocket or pouch.

Free of damaging or losing the cap

All-In-One DESIGN

Existing products have a separate cap so it can be lost or damaged.
But all-in-one design Touch-up style can be used
without having to worry about damaging or losing the cap.

- Using leak-proof, high quality fine mist spray pump.
- Our product is aircraft approved for hand baggage
- 5ml capacity containing up to 65 sprays

* fiume : In korean means 1) bloom 2) fragrant

Various colors available

TOUCH-UP fiume

Fiume was designed with the motif of transformation. We metaphorically expressed women's transformation after using Fiume with their perfume by transforming from square section of the top and bottom to round shape of the middle. Not only the elegant curves in the middle gives you a classy feel, it fits comfortably in your hand. It features an ergonomic design by applying Touch-up style allowing you to sensuously open and close with just your finger.

TOUCH-UP
BE:IN
SLIM & NORMAL

Simple and quick One Touch
Mist Spray for daily use

TOUCH-UP
BE:IN
SLIM & NORMAL

Touch-Up BE:IN was developed for the mass distribution of Touch-up system. Specially designed to mass produce the smart cover that implements the touch-up method at low cost, it provides safe portability while further enhancing the light feeling of the cover. Especially the ergonomic design was implemented at the pressing point to make pressing more comfortable. In addition, it can transform into a container that fits with its endless scalability of design based on the touch-up platform. The slim and normal type products that can be instantly sprayed wherever needed will be a game changer that will transform the paradigm of portable mist spray.
