GREENOL H / Natural Protector

#Long Lasting #Soft touch

#Diamond brilliance #Patent material

COLOR

THE FEATURES OF BXXX'S CONFIDENT PRODUCT

1. Diamond brilliance technology (Flat/ Hollow structure spectrum expansion technology)

A hollow structure is a structure type substance that has an empty center.

If the material responsible for coloration is processed into a hollow structure, it reduces the amount of light absorbed from the surface of the material and it is possible to form a wider colored zone because the scattering of light in a material reflects light in many ways.

2. GREENOL H(Patent no 10-0820010)

Patent completed for anti-oxidization hub to protect skin

3. NATURAL PROTECTOR (Patent no 10-0910747)

Transcendent patented composition for great skin soothing and moisturizing

Product ingredients

The above content is for raw material only

Lavender flower extract

Skin soothing and relieving

Rosemary Leaf Extract

Skin shine, Skin nutrition
