GEUM MEDAL GIM
(Gold Medal Laver)

SONGWHA FOOD

COMPANY INTRODUCTION

Our company specializes in the production, distribution, and sale of laver products under the brand name of Geum Medal Gim (meaning Gold Medal Laver) home and abroad. It aims to achieve its final goal of providing satisfaction to customers with products; that is why it does its best in carefully selecting top quality raw materials and producing good products. It will continue to make efforts to grow its “Geum Medal Gim” into a leading brand in the industry.

Under the premise that any food company that seeks profits only is unable to survive in the 21st century, the company approaches its customers with best quality products and at reasonable prices in its quest to fulfill its missions, which include the following:

First, to become a company that places the health of customers before anything else;

Second, to become a company that produces products of top quality;

Third, the prices shall be fair and reasonable.

Striving to accomplish these goals, we, all the employees of Songwha Food, will give top priority to the health of customer and make endeavors to produce high quality products that our customers have full trust in and look for at all times, thereby making growth together with them.

Production Process

Imaging Inspection to Detect Foreign Materials

Inspect if foreign materials are included in a raw material by passing it through an imaging detector (Foreign material size: 2mm*2mm or less)

1st Roasting

Manage raw materials at 150~340°C to turn to blue-green color after roasting in the far-infrared heater roasting method.

2nd Roasting

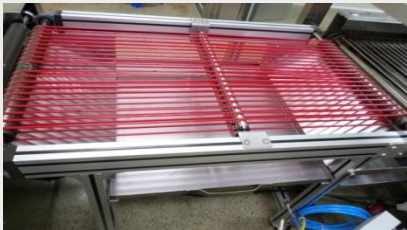

Manage raw materials at 150~370°C to turn to blue-green color after roasting in the far-infrared heater roasting method.

Auto-Seasoning

Season laver with sesame oil, salt, etc. according to the preset mixing ratio

Visual Inspection

Screen out laver out of the specification visually in the roasting process

Automatic Counting

Automatic counting of laver to the preset number after completing 2nd roasting and screening process

Inspection by a Metal Detector

Inspect if any metallic foreign material is included by passing the product-in-process through a metal detector

Inner Packing

Heat seal the cut roasted laver packed in the inner container.

Cutting

Automatic cutting to the preset size

PRODUCT

MINI LUNCHBOX LAVER PREMIUM

- Geum (Gold) Medal Laver uses top-quality laver grown in the clean waters of the West coast of Korea. Its sheets are thin in thickness and soft in taste.
- This product contains **OMEGA 3 and EPA** which is good for children at their growth stages.
- The seaweed contains various nutrients such as iodine, which helps to resolve the nutritional imbalance of picky children.
- This product contains less salt as it is served as a snack for children.
- SIZE : 16g (2g*8ea)

LUNCHBOX LAVER PREMIUM

- Geum (Gold) Medal Laver uses top-quality laver grown in the clean waters of the West coast of Korea. Its sheets are thin in thickness and soft in taste.
- This product contains **OMEGA-3 and EPA** which is good for children at their growth stages.
- The seaweed contains various nutrients such as iodine, which helps to resolve the nutritional imbalance of picky children.
