New virus infection,
You can overcome it with
a digital thermal guestbook.

PREVENTION OF
NEW VIRAL INFECTIONS
**DIGITAL THERMAL
GUESTBOOK**

CORONAVIRUS INFECTIONS DISEASE
DIGITAL HEAT SENSING GUESTBOOK

FIRST TIME IN THE COUNTRY!
PREVENTION OF NEW VIRUS INFECTION!
DIGITAL THERMAL GUESTBOOK

A new virus is spreading around the world,
So, EGMAX has released a digital thermal guestbook,
It is installed in places where many people gather, such as many institutions and stores,

Two simple ways to use

Choose which button to use

Write guestbook &
measure body temperature

QR code scan

1 The menu UI is intuitive

2 There are guidelines

3 You can write your name,
contact information, and journal information

4 Body temperature measurement and display of results

5 By judging the results, you can express normal or abnormal

6 You can check the measured data again

7 QR code can be scanned

What if a body temperature abnormality occurs?

The number of body temperature is displayed in red, Body temperature measurement results are also displayed in red letters.

1805 mm

530 mm

578 mm

QR code scan & thermal sensor

① QR code scan
You can scan QR codes generated by Naver and KakaoTalk,

② Thermal sensor
Active compensation function applied to reduce the effect of sudden changes in ambient temperature,

- Non-contact temperature measurement and remote temperature measurement
- Simultaneous measurement of sensor temperature and target temperature
- Accuracy : ±2% (Sensor Temp 0~50℃)
- Input voltage : 3,3V

Measure body temperature quickly

※ This product can measure human skin, It cannot be used as a medical device.
