There were no results found on the company or its shareholders in Compliance check

Jun 24, 2025

Legal notification screening on the company and its shareholders failed to reveal any adverse information

APPENDICES

CUSTOMER SERVICE

Inquiries should **always** contain the below minimum details:

- Full Company Name
- Full Headquarters Address
- Telephone Number
- Business Identification Number
- Contact Name
- Reference
- Order Date

The information in this report was last updated on Jun 24, 2025

D&B RATING GLOSSARY

D&B Rating - The D&B rating consists of two parts, the Financial Strength Indicator and the Risk Indicator.

For example: in the case of a 2A 4 rating, 2A means the financial strength of the business and the 4 is the risk indicator

The **Risk Indicator** is used in conjunction with the Financial Strength Indicator. The Risk Indicator reflects D&B's opinion of a company's health, stability and overall condition. It takes into consideration all significant elements of credit. Such classification is relative and is predicted on the broad and overall view point. Created from expert rules systems, the Risk Indicator is refreshed whenever data is loaded onto our databases. Please see the table below for the Risk Indicators and their corresponding values.

Risk Indicator	Rating	Description
4	Limited	Significant level of risk
3	Fair	Slightly greater than average risk
2	Good	Low Risk
1	Strong	Minimal risk
-	Undetermined	Undetermined Risk

The **Financial Strength Indicator** is based on either the Net Worth or Issued Capital. The table below contains the possible values.

Financial Strength Indicator		Range	
Net Worth	Capital	From	To
5A	5AA	\$60 million	and greater

4A	4AA	\$25 million	\$60 million
3A	3AA	\$12 million	\$25 million
2A	2AA	\$2.5 million	\$12 million
1A	1AA	\$1.2 million	\$2.5 million
A	AA	\$600,000	\$1.2 million
B	BB	\$345,000	\$600,000
C	CC	\$175,000	\$345,000
D	DD	\$120,000	\$175,000
E	EE	\$60,000	\$120,000
F	FF	\$35,000	\$60,000
G	GG	\$15,000	\$35,000
H	HH	0	\$15,000

Alternate Ratings Used	
NQ	Out of Business: Business has ceased to trade
NB	New Business: Less than 24 months
O	Financial Strength is undisclosed; or Assigned to companies that do not request credit in their normal activities (Bank, Brokerages, Insurance Co., Associations, Government, etc..)
N	Negative Net Worth
FB	Foreign Branch
BR	Domestic Branch
DS	Assigned to records that require investigation before a rating can be assigned.

FINANCIAL RATING GLOSSARY

Name	Formula	Explanation
Current Ratio (x)	Total Current Assets / Total Current Liabilities	This ratio shows the cover by current assets of short term creditors, and the higher the ratio the more assurance there is that payment of creditors can be met
Solvency Ratio (%)	((Total Current + Deferred + Long Term Liabilities) / Tangible Net Worth) x 100	From this can be seen the extent to which the company is financed by creditors and debt rather than permanent finance. The higher the ratio the more likely it is that the debt (either short term or long term) will be a burden to the company. The effect is higher interest changes, lower profits and a squeeze on liquidity to the disadvantage of creditors.
Fixed Assets to Net Worth (%)	(Total Fixed Assets / Tangible Net Worth) x 100	The proportion of net worth that consists of fixed assets will vary greatly from industry to industry, but in general terms a company is under capitalised if fixed assets exceed net worth. In this case it is possible that the company has too much debt, and it should therefore be examined with care. If on the other hand fixed assets are much lower than net worth the company is over capitalised and is either extremely cautious or in a position to expand. Thus a ratio either well in excess of the median, or well below it, means that the company should be looked at with care.

Current Liabilities to Net Worth (%)	(Total Current Liabilities / Tangible Net Worth) x 100	This contrasts the funds that creditors are temporarily risking with a company with the funds permanently invested by the owners. The higher the ratio the less security for creditors. Care should be exercised when selling to any company with creditors of less than one year exceeding two thirds of net worth
Asset to Sales (%)	(Total Assets(including intangibles) / Sales) x 100	This ratio measures how efficiently the company's management has been in generating sales from the assets at its disposal. The measure can vary considerably from industry to industry and should therefore be judged according to the industry norm
Sales to net working capital (x)	Turnover / Net working capital	This ratio indicates whether a company is overtrading (handling an excessive volume of sales in relation to working capital). Companies with substantial sales gains often reach a level where their working capital becomes strained. Even if they maintain an adequate total investment for the volume being generated (assets to sales) that investment may be so centred in fixed assets or other non-current items that it will be difficult to continue meeting all current obligations. A ratio falling into either an extremely high or low position may indicate potential problems.
